

Environment Policy

The Board of Directors of Heathcoat Fabrics Limited (HFL) regard compliance with environmental legal requirements and the continual improvement of environmental performance as a responsibility for employees at all levels. HFL will proactively and systematically integrate environmental considerations into the development, manufacture, dyeing, finishing, packaging and dispatch of woven and knitted fabrics.

Specifically, HFL will:

- Comply with applicable legislation, company policies and other requirements to which we subscribe and where practicable seek to achieve a level of environmental performance and best practice over and above regulatory and legislative requirements.
- Include environmental considerations in all major investment decisions.
- Assess environmental performance and ensure that all current and future activities, products and services are carried out with regard for the environment.
- Develop business objectives and targets that will help us maintain compliance, achieve continual improvement in environmental performance and prevent pollution.
- Communicate our policy, objectives and targets to staff, contractors, suppliers and customers to raise environmental awareness of activities and products as well as engaging in partnerships wherever possible to extend our environmental commitment with stakeholders.
- Provide appropriate environmental training, awareness briefings and notifications to staff and contractors working on behalf of HFL to ensure that our environmental goals are achieved.
- Evaluate, monitor and control the interactions with the environment as a result of our operations through the use of risk assessments, audits and system & procedural improvements aimed at improving environmental performance.
- Monitor our progress and review our environmental performance through board meetings and ongoing management review.

The Environmental Policy, its associated documents and procedures are issued under the authority of the Managing Director and implementation is mandatory on all persons having an impact on the environmental performance of HFL.
