Ultimate comfort & superior quality personal protection

heathcoat
fabrics

Our range: Heathcoat Fabrics prides itself on producing top quality fabrics and garments to meet customer specifications. Our range is available in unisex, men's or women's styles. We are not limited to the items highlighted in this brochure as we also offer bespoke textile solutions.

European standards compliant: Our inherently flame retardant garments are fully tested and CE marked to recognised international standards. Declarations of Conformity and Evidence of Certification can be provided on request.

Tailored solutions: We have created clothing for the Police and Fire Services, and for Workwear markets, including electricity and gas distribution companies. We have also supplied bespoke garments for military.

Colours: Standard colours are navy blue and tan. Special colours can be supplied. Please ask for further details.

Improved comfort: Our clothing is comfortable and durable after multiple laundering cycles. Fabrics incorporate our durable Ag+ finish, which gives effective restriction of bacterial growth meaning garments stay fresher for longer.

Sizes: All balaclavas and hoods are supplied in one standard size. All other garments are available in a range of sizes as required from XS to 3XL with special sizes available on request.

Delivery/Stock: Prices quoted are inclusive of delivery. Many items are available ex stock.

Logos & Designs: Logos and other designs can be embroidered or heat sealed.

**Flame retardant textiles, CE marked
and certified to the highest standards:**

BS EN ISO 11612: Protective clothing;
clothing to protect against heat and
flame.

BS EN ISO 14116: Protection against
heat and flame; limited flame spread
materials and material assemblies and
clothing.

BS EN 13911: Protective clothing for
firefighter requirements and test
methods for fire hoods.
